

Sprint 4 Plan

Heading:

Product name: PhotoOp

Team name: Team CIDL

Sprint completion date: 11/24/19

Revision number: 2

Revision date: 11/25/19

Goal:

- High level goal #2: Be able to recommend users picture-worthy places closest to their desired location

Task listing, organized by user story:

- User story 1: As a user I need to be able to input my desired location so that I can find locations closest to that
 - Task 1: Create front end UI component for user text input (1 hour)
 - Task 2: Parse the user text input and use it to calculate the distance between their location and recommended locations (0.5 hour)
 - Task 3: Display updated recommended location based on updated desired location (2 hours)
 - **Total for user story 1: 3.5 hours**
- User story 2: As a user, I need to be able to see recommended locations based on their proximity to my desired location
 - Task 1: Set up Google Maps Geocoding API (1 hour)
 - Task 2: Use the Geocoding API to get the coordinates of all the recommended photo locations and the user's desired location (3 hours)
 - Task 3: Calculate the distance between the user's desired location and each photo location and store it in a data structure (2 hour)
 - Task 4: Sort the data structure based on distances (1 hours)
 - Task 5: Create UI component to display the recommended photo locations as buttons (3 hours)
 - Task 6: Create UI components for details page that describes recommended location (1 hour)
 - Task 7: Allow user to navigate between home screen and location details screens (2 hours)
 - **Total for user story 2: 13 hours**
- User story 3: As a user, I need to be able to login so that I can save my preferred locations
 - Task 1: Create components for login screens (1 hour)
 - Task 2: Use firebase authentication module to authenticate user (4 hours)
 - **Total for user story 3: 5 hours**
- User story 4: As a user, I want a pleasant user interface and experience
 - Task 1: Add cohesive styling to all components (2 hours)

- Task 2: Display comprehensive list of recommended locations (2 hours)
- **Total for user story 4: 4 hours**

Team roles:

1. Iva: Developer
2. Chhavi: Developer, Scrum Master
3. Disha: Developer
4. Leah: Product Owner, Developer

Initial task assignment:

Iva	User story 2, task 1
Chhavi	User story 2, task 2
Leah	User story 1, task 2
Disha	User story 1, task 1
