Sprint 1 Report

Heading:
Product Name: PhotoOp
Team Name: CIDL
Date: 10/20/19

Actions to stop doing:
- Waiting until the last minute: This sprint we waited until the end of the sprint because of confusion about due dates, campus power outage, etc.
- Trying to do everything in a group: We tried to plan to do the initial setup as a group when it would have been more efficient if one person were to do it and then teach the team.

Actions to start doing:
- Set up proper group work sessions: For certain aspects of development it would be more efficient to do as a group or smaller group to help bridge gaps in knowledge.
- Split up stories into tasks more accurately: Each task is really big right now, for instance, one of our tasks was to design and implement the login screen, which can be split into two parts.
- Better time estimates: We underestimated how long it would take to setup or learn about how to use unfamiliar technologies.

Actions to keep doing:
- Good planning: All members were on top of planning meetings and sprint stories and tasks.
- Good communication: All members responsive and willing to discuss planning and development tasks.

Work completed/not completed:
- Completed
  - No stories were completed, only tasks in stories were completed
- Not completed
  - User story 1: As a user, I need to be able to see my recommended locations in order of closest to farthest from my current location and be able to see the distance of each location so I can decide which place I would like to go to.
  - User story 2: As a user, I need to be able to login so I can see my personalized recommendations.

Work completion rate:
- Total number of user stories
  - 0
- Total number of estimated ideal work hours
  - 10

- Total number of days
  - 14
- User stories/day
  - 0
- Work hours/day
  - 0.71
- Burn up chart
